EXPERIENCE

Intezer Labs - *Security Advocate* - October 2020 - Current

- Kept informed of Cyber Security news providing security professionals with trends and best practices on mitigation in easy-to-understand terms
- Collaborated with security researchers on technical content in multiple forms to educate security professionals on security best practices
- Partnered with DevOps groups to promote best practices in creating DevSecOps teams.
- Educated security professionals at over 25 conferences on monitoring and reacting to threats within their environments

A Cloud Guru/ Linux Academy - *Community Training Architect* - July 2018 - September 2020

- Created customer-facing and technical courses, study groups, podcasts, as well as blog posts for container and security topics
- Organized and Co-Hosted cloud and security meetups and conferences
- Participated and spoke at international conferences and meetups to help build and strengthen community relationships

Rackspace – *OpenStack Technical Trainer* - July 2017 - July 2018

- Created and presented workshops and training on OpenStack technologies for local, national, and worldwide conferences
- Created customer-facing training material for classroom and web-based training
- Conducted strategic needs analysis conversations and made recommendations based on business objectives and KPIs

Rackspace – *Enterprise Linux Administrator* - October 2014 - July 2017

- Managed enterprise-level account Linux servers.
- Focused on troubleshooting and resolving system service issues and OS level issues.
- Provided customer action plans and reports based on monitoring alerts, server logs, system resources and customer feedback.
